QUICK FIX GUIDE 2

IS YOUR CANISTER FILTER LEAKING?

Troubleshoot your canister filter with these 5 quick checks.

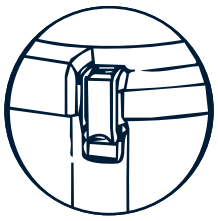

1

CHECK THE LID SEAL

Ensure the lid o-ring is clean, seated correctly and not damaged. A dirty or misaligned o-ring can cause leaks.

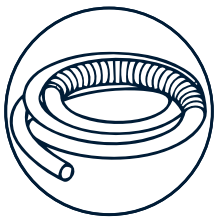

2

CHECK THE LATCHES

Make sure all latches are closed and locked properly. Loose or uneven latches can cause the lid to leak.

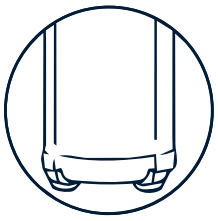

3

CHECK HOSE CONNECTIONS

Ensure all hose connections are tight, secure and sealed. Loose connections can cause water leaks.

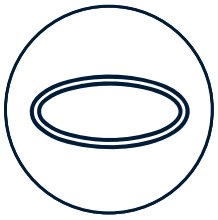

4

CHECK THE CANISTER BODY

Inspect the canister body for cracks or damage. Even small cracks can cause leaks under pressure.

5

CHECK ALL O-RINGS

Inspect and clean all o-rings and seals. Replace any that are worn, cracked or flattened.
